

DHAGASH PANDYA

Backend & AI Developer

Surat, Gujarat, India | github.com/Dhagash1206 | leetcode.com/dhagash1206

EDUCATION

Sardar Vallabhbhai Patel National Institute of Technology (SVNIT)

(2024 - 2028)

B.Tech, Artificial Intelligence

Currently pursuing B.Tech in Artificial Intelligence at SVNIT, Surat, building a strong technical foundation through core subjects including Computer Networks, Operating Systems, Data Structures & Algorithms, and Database Management Systems, complementing my AI-focused curriculum in machine learning and intelligent systems.

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript
- **Frameworks & Libraries:** Django, MERN Stack
- **Databases & Cloud:** MySQL, PostgreSQL, Firebase, MongoDB
- **AI / ML / Data Analysis:** MNIST, OpenCV, Numpy, Pandas, TensorFlow, Scikit-Learn, Keras, PyTorch
- **Tools/Deploy:** Git, Github, Vercel, Railway

PROJECTS

Django Task Manager

[Repo Link](#)

Python | Django | PostgreSQL | Firebase

- Full-featured Django web app combining a to-do list and rich text notes manager, backed by PostgreSQL in production
- Implemented session-based authentication with GitHub sign-in via Firebase
- Built a protected personal dashboard with task management
- <https://github.com/Dhagash1206/Django-taskmanager>

College ERP Scalable System

[Repo Link](#)

Python | Django

- Django-based college management system streamlining student-teacher operations at scale
- Managed attendance, marks, and timetables with role-based access for students, teachers, and admins
- Implemented Shared Authentication System with separate dashboards per Role
- <https://github.com/Dhagash1206/College-ERP-system>

CNN Deep Digit Scanner

[Repo Link](#)

Python | TensorFlow | CNN | MNIST

- Deep learning app that recognizes handwritten digits using a CNN trained on MNIST, achieving 99%+ test accuracy
- Architected a multi-layer CNN with Batch Normalization and Dropout for improved generalization
- <https://github.com/Dhagash1206/CNN-Deep-digit-scanner>

Backend Logic System

[Repo Link](#)

Python | JavaScript

- Implementing Production level Real-World Backend Systems
- CORS configuration for safe cross-origin resource sharing
- <https://github.com/Dhagash1206/Backend-Logic-Systems>

Certificate

- Completed Summer Training Program on "Remote Sensing & GIS Using Python" by India Space Academy, Department of Space Education, India Space Week, gaining hands-on skills in geospatial data analysis and Python-based GIS applications for real-world environmental and spatial problem-solving. ([Certificate Link](#))
- [Github Repo Link](#)

COMPETITIVE PROGRAMMING

LeetCode leetcode.com/dhagash1206

Solved 300+ problems on LeetCode, focusing on Data Structures and Algorithms including arrays, trees, graphs, and dynamic programming. Consistent practice has strengthened my problem-solving approach and ability to write optimized, efficient code. Competitive programming has been a core part of my technical growth as a developer.

OPEN SOURCE CONTRIBUTIONS

AwesomeCheatsheets github.com/LeCoupa/awesome-cheatsheets

Active contributor to AwesomeCheatsheets, an open-source developer reference hub with 20,000+ GitHub stars.

POSITIONS OF RESPONSIBILITY

Executive Member, TEDxSVNIT

Organized and managed TEDx-licensed events at SVNIT, Surat, coordinating logistics, speakers, and audience engagement.

Executive Member, Nexus — Coding Community, SVNIT

Active executive at SVNIT's official coding community, driving competitive programming initiatives and technical events on campus.

INTERESTS

I am deeply Passionate about Building scalable backend systems and exploring the intersection of AI and software engineering. Deeply Interested in Large Language Models, Computer Vision, and Deep Learning. Enjoy contributing to open source, solving algorithmic problems, and staying current with emerging technologies in the ML and backend development ecosystem.
